PROFILE

Enthusiastic Flutter developer with a solid foundation in mobile app development and a passion for creating efficient, visually appealing applications. Skilled in transforming design concepts into efficient and user-centric applications that solve real-world challenges. Dedicated to delivering high-quality, scalable mobile apps and committed to continuous learning and professional growth.

EDUCATION

Kafr El-Sheikh University

Bachelor of Artificial Intelligence Science *Sep 2020 – June 2024*

WORK EXPERIENCE

Flutter Developer Mar 2025 – Present

Future of Egypt *Full-time*

- Design and build high-quality, cross-platform mobile applications using Flutter and Dart, ensuring modern UI/UX and seamless user experiences.
- Implement scalable architectures and effective state management (Bloc, Cubit, Riverpod), integrating RESTful APIs, Firebase, and payment gateways.
- Collaborate with cross-functional teams in an Agile environment to develop, test, and maintain production-ready mobile solutions.

Flutter Developer Apr 2025 – May 2025

Upwork *Freelance*

- Built a cross-platform Flutter app for managing job applications, featuring search, filters, visual stats, and profile management.
- Integrated Supabase for secure user auth, real-time database, and file storage; applied Riverpod for clean, scalable state management.
- Delivered a polished, intuitive UI with dark/light theme support and smooth user experience.

Flutter Developer Intern Sep 2024 – Nov 2024

Cellula Technologies *Remote*

- Developed and integrated AI-powered features into Flutter apps, enhancing functionality using various AI APIs.
- Built responsive UIs and optimized performance across devices, ensuring smooth user experiences.
- Collaborated in Agile teams on app development, code reviews, and delivering high-quality solutions for multiple clients.

PROJECTS

ICare ⬇ | *Child Care, AI — (Graduation Project A+)*

- Designed and implemented AI-powered functionalities including a Baby Cry Predictor to identify baby's needs through audio analysis and ICareBot for instant parenting advice.
- Implemented Speech Therapy Module: Created a structured speech therapy feature with multiple levels of exercise to help children with speech difficulties, providing personalized feedback and progression tracking.
- Developed community-building features like posts, comments, likes, bookmarks, and private messaging, enabling mothers to connect, share experiences, and support each other within the app.
- Built user-centric features such as daily parental tips, emergency medical information access, and a dark theme for comfortable viewing, ensuring practical support and ease of use for mothers.

Storeify ⊙ | *E-Commerce*
- Developed a feature-rich e-commerce Flutter app with product categorization, store browsing, and integrated shopping cart.
- Engineered a secure checkout system with multi-gateway payment integration for seamless transactions.
- Optimized product browsing and store interactions to enhance performance and user engagement.
- Designed a responsive, user-friendly interface for smooth navigation and shopping experience.

Linkup ⬇ | ⊙ | *Social Networking*
- Developed a social app with features like Posts, Likes, and Comments to enhance user interaction.
- Integrated Chat, Follow/Unfollow, and real-time connection features for meaningful interactions.
- Optimized user experience with Search, Post Engagement, and Account Management features.

Roome ⊙ | *Hospitality*
- Developed a hotel booking platform with features like "Near Me," "Recommended," and "Popular" hotel options.
- Created a seamless booking system for searching, viewing, and completing hotel reservations effortlessly.
- Integrated OpenStreetMap for location tracking and local notifications, ensuring a smooth and responsive user experience.

Personal Portfolio 🔗 | ⊙ | *Flutter Web Development*
- Created a responsive personal portfolio website using Flutter to highlight skills, experience, and projects.
- Implemented a responsive design for a seamless user experience across devices.
- Used Firebase for hosting and deployment, ensuring a smooth and fast web experience.

SKILLS

Languages: Dart, OOP
Frameworks: Flutter
Architecture: Clean Architecture, MVVM, MVC
State Management: Bloc, Cubit, Riverpod
Tools: Git, GitHub, Firebase, Supabase
Local Storage: Hive, SQLite (Floor)
Others: UI/UX Implementation, Payment Gateways, REST APIs, Responsive design, Problem solving
Interpersonal: Communication, Team Collaboration, Active listening
Work Ethic: Time Management, Attention to Detail, Adaptability
Mindset: Curiosity, Willingness to Learn, Client-Oriented Thinking
