PROFILE

Enthusiastic Flutter developer with a solid foundation in mobile app development and a passion for creating efficient, visually appealing applications. Skilled in transforming design concepts into efficient and user-centric applications that solve real-world challenges. Dedicated to delivering high-quality, scalable mobile apps and committed to continuous learning and professional growth.

EDUCATION

Bachelor of Artificial Intelligence Science (GPA 3.36 / 4.0)　　　　　　Sep 2020 – June 2024
Kafr El-Sheikh University

Mobile Development Using Flutter(60hrs.)　　　　　　Jan – Feb 2023
Information Technology Institute

WORK EXPERIENCE

Flutter Developer　　　　　　Jan 2025 – Nov 2025
Future of Egypt　　　　　　*Full-time*

- Designed and built high-quality, cross-platform mobile applications using Flutter and Dart, ensuring modern UI/UX and seamless user experiences.
- Implemented scalable architectures and effective state management (Bloc, Cubit, Riverpod), integrated RESTful APIs, Firebase, and payment gateways.
- Collaborated with cross-functional teams in an Agile environment to develop, test, and maintain production-ready mobile solutions.

Flutter Developer　　　　　　Apr 2025 – May 2025
Upwork　　　　　　*Freelance*

- Built a cross-platform Flutter app for managing job applications, featuring search, filters, visual stats, and profile management.
- Integrated Supabase for secure user authentication, real-time database, and file storage; applied Riverpod for clean, scalable state management.
- Delivered a polished, intuitive UI with dark/light theme support and smooth user experience.

Flutter Developer Intern　　　　　　Sep 2024 – Nov 2024
Cellula Technologies　　　　　　*Remote*

- Developed and integrated AI-powered features into Flutter apps, enhancing functionality using various AI APIs.
- Built responsive UIs and optimized performance across devices, ensuring smooth user experiences.
- Collaborated in Agile teams on app development, code reviews, and delivery of high-quality solutions for multiple clients.

PROJECTS

ICare 📥 | *Child Care, AI — (Graduation Project A+)*

- Designed and implemented AI-powered functionalities including a Baby Cry Predictor for identifying needs through audio analysis and ICareBot for instant parenting advice.
- Implemented a Speech Therapy Module featuring structured multi-level exercises to assist children with speech difficulties, providing personalized feedback and progression tracking.
- Developed community-building features such as posts, comments, likes, bookmarks, and private messaging, enabling mothers to connect, share experiences, and support one another.
- Built user-centric features including daily parental tips, emergency medical information access, and dark mode support for comfortable viewing.

Storeify 🎧
- Developed a feature-rich e-commerce Flutter app with product categorization, store browsing, and integrated shopping cart.
- Engineered a secure checkout system with multi-gateway payment integration for seamless transactions.
- Optimized product browsing and store interactions to enhance performance and engagement.
- Designed a responsive, intuitive interface for smooth navigation and shopping experience.

Linkup ⬇ | 🎧
- Developed a social networking app with features such as posts, likes, and comments to enhance interaction.
- Integrated chat, follow/unfollow, and real-time connection features for meaningful engagement.
- Optimized experience with advanced search, post engagement tracking, and account management functionality.

Roome 🎧
- Developed a hotel booking platform with features such as "Near Me," "Recommended," and "Popular" hotel options.
- Implemented a seamless booking system for searching, viewing, and completing hotel reservations.
- Integrated OpenStreetMap for location tracking and local notifications.

Personal Portfolio 🔗 | 🎧
- Created a responsive portfolio website using Flutter to showcase skills, experience, and projects.
- Implemented a fully responsive design for a consistent experience across devices.
- Integrated Firebase hosting and deployment for smooth and fast web performance.

SKILLS

Languages: Dart, OOP
Frameworks: Flutter
Software Engineering: SOLIDs, Clean Code Practices, Design Patterns
Architecture: Clean Architecture, MVVM, MVC
State Management: Bloc, Cubit, Riverpod
Local Storage: Hive, SQLite (Floor)
CI/CD pipelines: GitHub Actions, Fastlane
Mobile App Development: UI/UX Implementation, Payment Gateways, REST APIs, Notifications, Secure Storage, Responsive design, Problem solving
Tools: Git, GitHub, Firebase, Supabase,
Interpersonal: Communication, Team Collaboration, Active listening
Work Ethic: Time Management, Attention to Detail, Adaptability
Mindset: Curiosity, Willingness to Learn, Client-Oriented Thinking
